SUMMARY

UI/UX and Product Designer with internship experience designing two B2B SaaS products, CSync and Emplyr, end to end as a company's sole designer, from research and information architecture to high-fidelity UI, prototypes and design systems. B.Des (UI/UX) student with a CGPA of 8.79 who turns user research into accessible, gamified and dashboard-driven experiences for web and mobile.

SKILLS

UX: User Research, User Interviews, Desk Research, Personas, Journey Mapping, Information Architecture, User Flows, Wireframing, Prototyping, Interaction Design, Design Thinking, Lean UX

UI & Product: Visual Design, Design Systems, Responsive Web & Mobile UI, SaaS & Dashboard Design, Accessibility (WCAG 2.1 AA), Universal Design, Gamification, Branding

Tools: Figma (Auto Layout, Components, Variables, Prototyping), Adobe Photoshop, Adobe Illustrator, Adobe InDesign, Canva, DaVinci Resolve, Shopify

EXPERIENCE

UI/UX Design Intern (Sole Designer) · Intellosoft Infotech — Mar 2026 – Oct 2026 · Internship Letter

- Owned end-to-end product design for **CSync**, a B2B SaaS platform that brings a Company Secretary firm's tasks, deadlines, compliance and client records into one workspace; delivered **20+ high-fidelity web and mobile screens**, user flows and interactive prototypes in Figma.
- Designed core modules including the CS Calendar and Compliance Planner, and built a scalable design system that kept the product consistent across web and mobile.
- Designed **Emplyr**, an HRMS SaaS product for mobile and web: **30+ screens** covering employee, manager and admin views, plus web-app dashboards, with role-specific flows for each user type.
- Created CSync's brand identity and launch marketing: logo, social media collaterals and product demo videos edited in DaVinci Resolve; also enhanced the Intellosoft company website.

Graphic & UI Designer Intern · Prodaily — Jun 2025 – Sep 2025 · Experience Letter

- Designed and launched the brand's **Shopify e-commerce website** from scratch, creating **10+ UI screens** for a seamless shopping experience.
- Developed the brand identity, including logo and packaging, and **15+ website and social media marketing collaterals** for a consistent visual brand across channels.

Media & Communication Intern · House of Mantram — Jan 2025

- Created visual content and storytelling for 2 heritage crafts at a luxury exhibition hosted by House of Mantram and **Taj Hotels**, enhancing visitor engagement with each craft's story.

PROJECTS

Team Forge · Gamified Team Management App (Mobile)

- Uncovered why startup interns feel invisible through desk research and **20+ interviews** with interns and startup professionals; turned the insights into a persona, journey map, success metrics and information architecture.
- Designed **12 high-fidelity screens** for an XP-based loop where approved work earns XP, unlocks milestones and becomes a verifiable certificate interns can add to LinkedIn.
- Added a team-lead review queue (approve, feedback and kudos in one card) and a visible review timeline to tackle slow approvals, interns' biggest frustration.
- Built a token-based design system with a custom icon set, illustrated avatars and four-tier badges, meeting WCAG AA contrast.

Cognify · Accessible Productivity App for Young Adults with Dyslexia (Mobile)

- Ran **10 user interviews and 3 expert interviews** (including a NIMHANS specialist) and synthesised them into four core problem themes.
- Designed **12 screens** around "Cogni", a calm AI companion that breaks big tasks into small steps, simplifies dense text and reads it aloud, with non-competitive gamification (small wins, streaks with rest days).
- Applied Universal Design principles and **WCAG 2.1 AA**: dyslexia-friendly typography (Lexend, Atkinson Hyperlegible), generous line spacing, a calm two-hue palette and focus timers that show time spent instead of a countdown.

EDUCATION

B.Des in UI/UX Design · Jagran Lakecity University, Bhopal — Sep 2023 – Present

CGPA 8.79 · Awarded the **Marker's Cup** for outstanding academic performance

Coursework: Design Thinking, Design Research Methodologies, Ethnography in User Research, Ergonomics in UX, UI Development
